KEY PROJECTS

- TSMC Revenue Prediction using Time Series Analysis** | *Mentor: Prof Subhas C. Misra* | May'23-Jun'23
 - Compared the revenue forecasting performance of **SARIMA**, **Holt-Winters**, and **Prophet** time-series models using **R**.
 - Generated visualizations using **ggplot**, and utilized **AICc** to select the optimal model based on goodness of fit and complexity.
 - Compared the performance of each model using **rolling origin** cross-validation and calculating 4 metrics (**RMSE**, **MAE**, **MASE**, and **MAPE**) providing valuable insights for investors by forecasting the monthly revenue **3 months** into the future.
- Exploratory Data Analysis of Death Rates** | *Course Project* | Aug'22-Nov'22
 - Performed a comprehensive comparison between developed and developing nations based on GDP, HDI, and death rates.
 - Utilized **web-scraping** in **R** and WHO's **API** to extract relevant data, and cleaned it to remove inconsistencies and outliers.
 - Developed an interactive **Shiny App**, and prepared a comprehensive report summarizing the key findings of the analysis.
- Pets Caretaker website** | *Self Project* | Jan'23-Feb'23
 - To develop a **web-based platform** that connects pet owners with pet caretakers, providing a seamless user experience.
 - Developed visually appealing UI using **HTML**, **CSS**, **Bootstrap**, **Javascript**, and **JQuery**, enhancing user experience.
 - Implemented efficient **SQL** database for storing user information, pet details, and profiles, ensuring proper data management.
 - Utilized **Node.js** and **AngularJS** for seamless authentication, profile management, and efficient search functionality.
 - Implemented user-friendly **signup** and **login**, personalized profiles, and added a "Find Caretaker" feature to help pet owners find caretakers themselves. Ensured safety by addressing complaints and **blocking** inappropriate users.
